

Introduction

Build mobile app for food delivery system using WordPress and Woocommerce

WordPress Plugin Installation

To install plugin build-app-online for WordPress follow these steps.

1. Unzip downloaded main.zip file
2. Instal plugin **build-app-online.zip**
3. In Wordpress admin panel. **Plugins > Add New > Upload plugin > Choose file** Chose downloaded **build-app-admin.zip** file and Install and activate.
4. Turn on the WordPress permalink on **Settings > Permalinks**.

WooCommerce API

Generate WooCommerce Api Key

1. It's required to turn on the WordPress permalink on **Settings > Permalinks**
2. Visit **WooCommerce > Settings > Advanced > REST API** tab and tick the Enable REST API Checkbox
3. Go to API **WooCommerce > Settings > Advanced > REST API > Keys/Apps > Add Key**
4. Option. Choose level of access Read/Write. then select the button Select the user in user field and add a descriGenerate API Key.
5. Go to API **WooCommerce > Settings > Advanced > REST API > Keys/Apps > Add Key**
6. Now you should see two new keys, These two keys are your Consumer Key and Consumer Secret
7. Use these ConsumerKey and ConsumerSecrete when you build mobile app

Google map api key generation and configuration

Creating a project in Google Cloud Platform

Create a project at [Google Developers Console](#). This is required because you'll need APIs to integrate Google Maps in your app.

Go to the [Google Developers Console](#)

Click NEW PROJECT and enter the details.

Click on the current project name again and you should see your new project created in the list.

Enabling the Maps API

Once the project is created, you'll have to enable the Maps API SDK for both Android and iOS.

1. Click the Library menu on the left
2. Search for "Maps SDK"
3. Click Maps SDK for iOS and then click Enable
4. Click Maps SDK for Android and then click Enable

Generating and restricting API keys

The next step is to generate the API keys.

1. Click on the Credentials menu on the left
1. Click the + CREATE CREDENTIALS button
2. Select the API key option

Enable billing

1. Go to the [API Console](#).
2. From the projects list, select a project or create a new one.

3. Open the console left side menu and select Billing 
4. Click Enable billing. (If billing is already enabled then this option isn't available.)
5. If you don't have a billing account, create one.
6. Select your location, fill out the form, and click Submit and enable billing.
